

MINDS

Meaningful, Intelligent,
Novel, and Deployable Solutions

*The Trusted Global Platform for
Scaling AI Innovations And Impact*

In Collaboration with Accenture

Hosted by the Centre for AI Excellence in collaboration with the Centre for Nature and Climate, Centre for Frontier Technologies and Innovation, Centre for Advanced Manufacturing and Supply Chains, Centre for Financial and Monetary Systems, Centre for Energy and Materials, Centre for Cybersecurity, Centre for New Economy and Society and Global Industries Team

Our Workstreams

Centre for AI Excellence

2026 Priorities

Key Initiatives and Workstreams

Accelerating Impactful AI Innovation and Adoption

Transformation of Industries and Governments (AIGA)

*Shaping industries by driving
AI adoption across sectors*

MINDS: Meaningful, Intelligent, Novel, and Deployable Solutions

*Helping leader unlock the full value of AI
for business and society*

AI-First Enterprises (AIGA)

*Uncovering AI-first enterprise insights for
bold transformations*

AI and Energy Impact (AIGA)

*Aligning AI with clean,
efficient energy use*

Preparing Countries and Society for the Intelligent Era

AI Competitiveness through Regional Collaboration (AIGA)

*Scaling AI readiness through
regional partnerships*

The Connected Future Initiative

*Mapping the future architecture of
the internet*

Technology Convergence

*Exploring tech intersections for
future innovation*

Advancing Trustworthy Technology and Effective Governance

AI and Data Governance (AIGA)

*Building adaptive, global
AI governance tools*

Frontier AI Systems and Capabilities (AIGA)

*Shaping safe and effective AI agent
deployment*

Global Coalition for Digital Safety

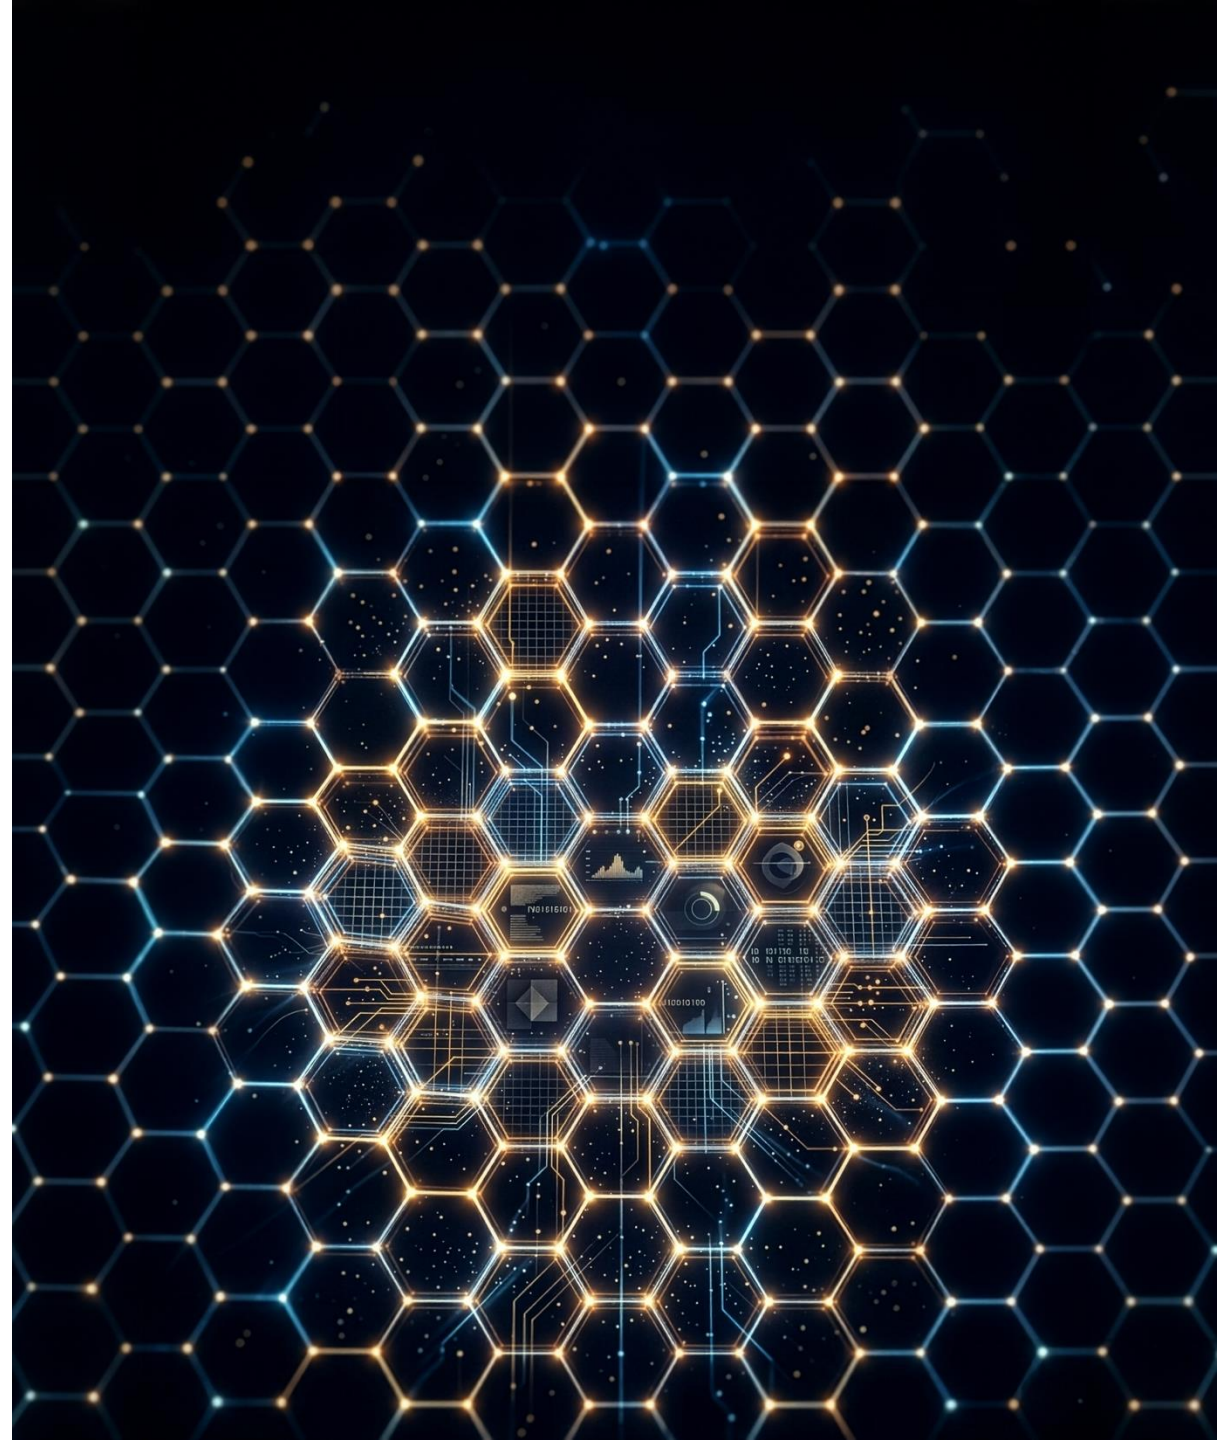

*Combating online harms
through global action*

MINDS

MINDS helps leaders unlock the full value of AI for business and society.

How?

- **Spotlight** proven solutions to greatest industry and societal challenges, carefully selected by world's leading thought leaders.
- **Connect** experts to share learnings and apply them safely and fast.
- **Equip** organizations to benchmark performance, connect with relevant peers, and advance – supporting organizations at every stage of maturity.

By mapping applications to six impact areas, MINDS highlights how AI creates value not only for organizations, but also for the system-level challenges shaping our future.

Accelerate growth through productivity and innovation

Raise productivity, quality, speed, and innovation across operations, decisions, products, and customer experiences, so organizations create more value with fewer inputs.

Expand learning, skills, culture and opportunity

Remove barriers of cost, language, disability, and location, and connect people to education, work, culture, and lifelong development.

Build a sustainable planet, energy and food systems

Cut emissions and waste, raise resource productivity, protect water and biodiversity, and accelerate cleaner energy and more sustainable production.

Build healthier lives with better healthcare

Prevent disease, improve diagnosis and treatment, expand access and affordability, and make health systems more proactive, equitable, and effective.

Build resilient infrastructure, communities & supply chain

Strengthen critical infrastructure and mobility, anticipate and absorb shocks, keep essential services running, and speed response and recovery.

Safeguard trusted information and governance

Make information and transactions more reliable, secure systems and identities, reduce fraud and cyber risk, and make decisions and services fast, fair, and accountable.

How the Program Works – In Short

Application

Teams can apply during one of **the two yearly application windows**:

- Applications are evaluated on **Impact** and **Novelty**, with required **Responsibility** criteria
- Top applications reviewed by executives from industries, governments and academia (**Impact Council**).
- Applications are grouped by system-level challenges to show where they create impact, without affecting selections.

Connect

Meet the community during the **MINDS Exchange Series**:

- Building a trusted network on AI innovation
- Focused exchanges on enablers, successes, challenges, next steps.
- Practical insights captured and shared progress.

(details in slide 14)

Spotlight

Selected cases will be spotlighted across multiple Forum channels and events.

Each selected company is invited to name a **C-level** executive leading AI transformation and **up to five key team members**.

(details in slide 13)

Intelligence Platform

Forum Partners gain access to a growing **Intelligence Platform** that captures insights across applications, and industries:

- Benchmark performance and maturity across AI use cases and transformations.
- Access aggregated insights, patterns, and emerging best practices.
- Translate collective learning into practical guidance for scaling AI.

Why Should You Apply to MINDS?

Learn and Speed Up Your AI Journey

If you are:

- Building AI capabilities and looking to accelerate progress
- Want practical insights, benchmarking, and peer learning
- Value workshops, exchange, and real-world cases
- Focused on moving from experimentation to impact
- Looking to assess maturity and define next steps with confidence

Establish as Leading AI Innovator

If you are:

- Delivering proven, high-impact AI solutions or transformations
- Seeking global recognition and best-in-class positioning
- Want to shape standards and share leading practices
- Positioned to demonstrate scale, credibility, and real impact
- Motivated to contribute insights and influence broader AI adoption

A Platform for Everyone – Value for Applicants

What all applicants shortlisted for the Deep Dive Get

Platform Feature

Be featured in the Forum Intelligence Platform

Each team that reached the Deep Dive Stage, will be featured in the Forum Intelligence Platform.

What all Forum Partners Get, Just by Applying

Matchmaking

Get access to our peer learning platform

Meet teams around the world that are facing the same challenge as yours, or working at their solutions; exchange ideas and speed up your journey.

What CAIE Partners Get, Just by Applying

Intelligence Platform

Get access to the Forum's Intelligence platform

CAIE members, only by applying get access to the Forum Intelligence Platform with highly personalized, globally sourced and verified insights and inspiration.

What Selected Organizations Get

Spotlight

Have your solution featured in Forum's channels

Company leadership and members of the teams are recognized for their accomplishments in creating impact using AI.

How To Apply – Single or Joint Applications

The Forum, through MINDS, can play a unique role in recognizing and amplifying valuable partnerships. Achieving scale and impact with AI isn't straightforward, in many cases it takes meaningful collaboration to get there.

Your company is using AI internally to transform the way your business operates

If the enabling solution was **developed by a single company**, even if using services from different providers, you can apply alone, bringing your own story

You developed an AI solution that is helping clients, or partners, transforming their processes

If you are a **startup** or a **tech provider**, we want to understand how you've worked with your clients and partners to create impact with AI. In this case, **you must apply together**, and both companies must be involved.

You are enabling completely new scenarios or connecting ecosystems

If your AI solutions is used in scenarios that go beyond the first two scenarios – i.e. you're not using AI to transform processes internally, but you're **enabling new market dynamics** or **ecosystem** behaviours – apply alone.

WHAT WE DO NOT EVALUATE

- ☐ We do not assess general-purpose AI tools that lack demonstrated context or domain deployment (e.g. a generic chatbot without a clear applied case).
- ☐ We do not include AI uses tied to sectors or actors excluded by World Economic Forum engagement policies — for example, military, weapons, or other controversial fields — or applications from or for organizations whose core business conflicts with public welfare (e.g. tobacco, arms, etc.).

Evaluation Pillars

Three foundational dimensions are assessed to identify the most impactful transformations enabled by AI across industries. The **more details** are shared in the **application survey**, the better the application can be understood and evaluated.

Impact

Evaluates how AI creates meaningful value for business, the environment, or society.

Problem Severity

The significance of the problem or business challenge addressed.

Scale

The level of adoption and impact achieved, from local to society.

Novelty

Evaluates how the solution introduces new approaches, solves problems in a better way, or enables new capabilities and ecosystems.

Enables new ways of solving old problems more effectively, solves previously hard-to-solve challenges, or leverages new ecosystems

Responsibility

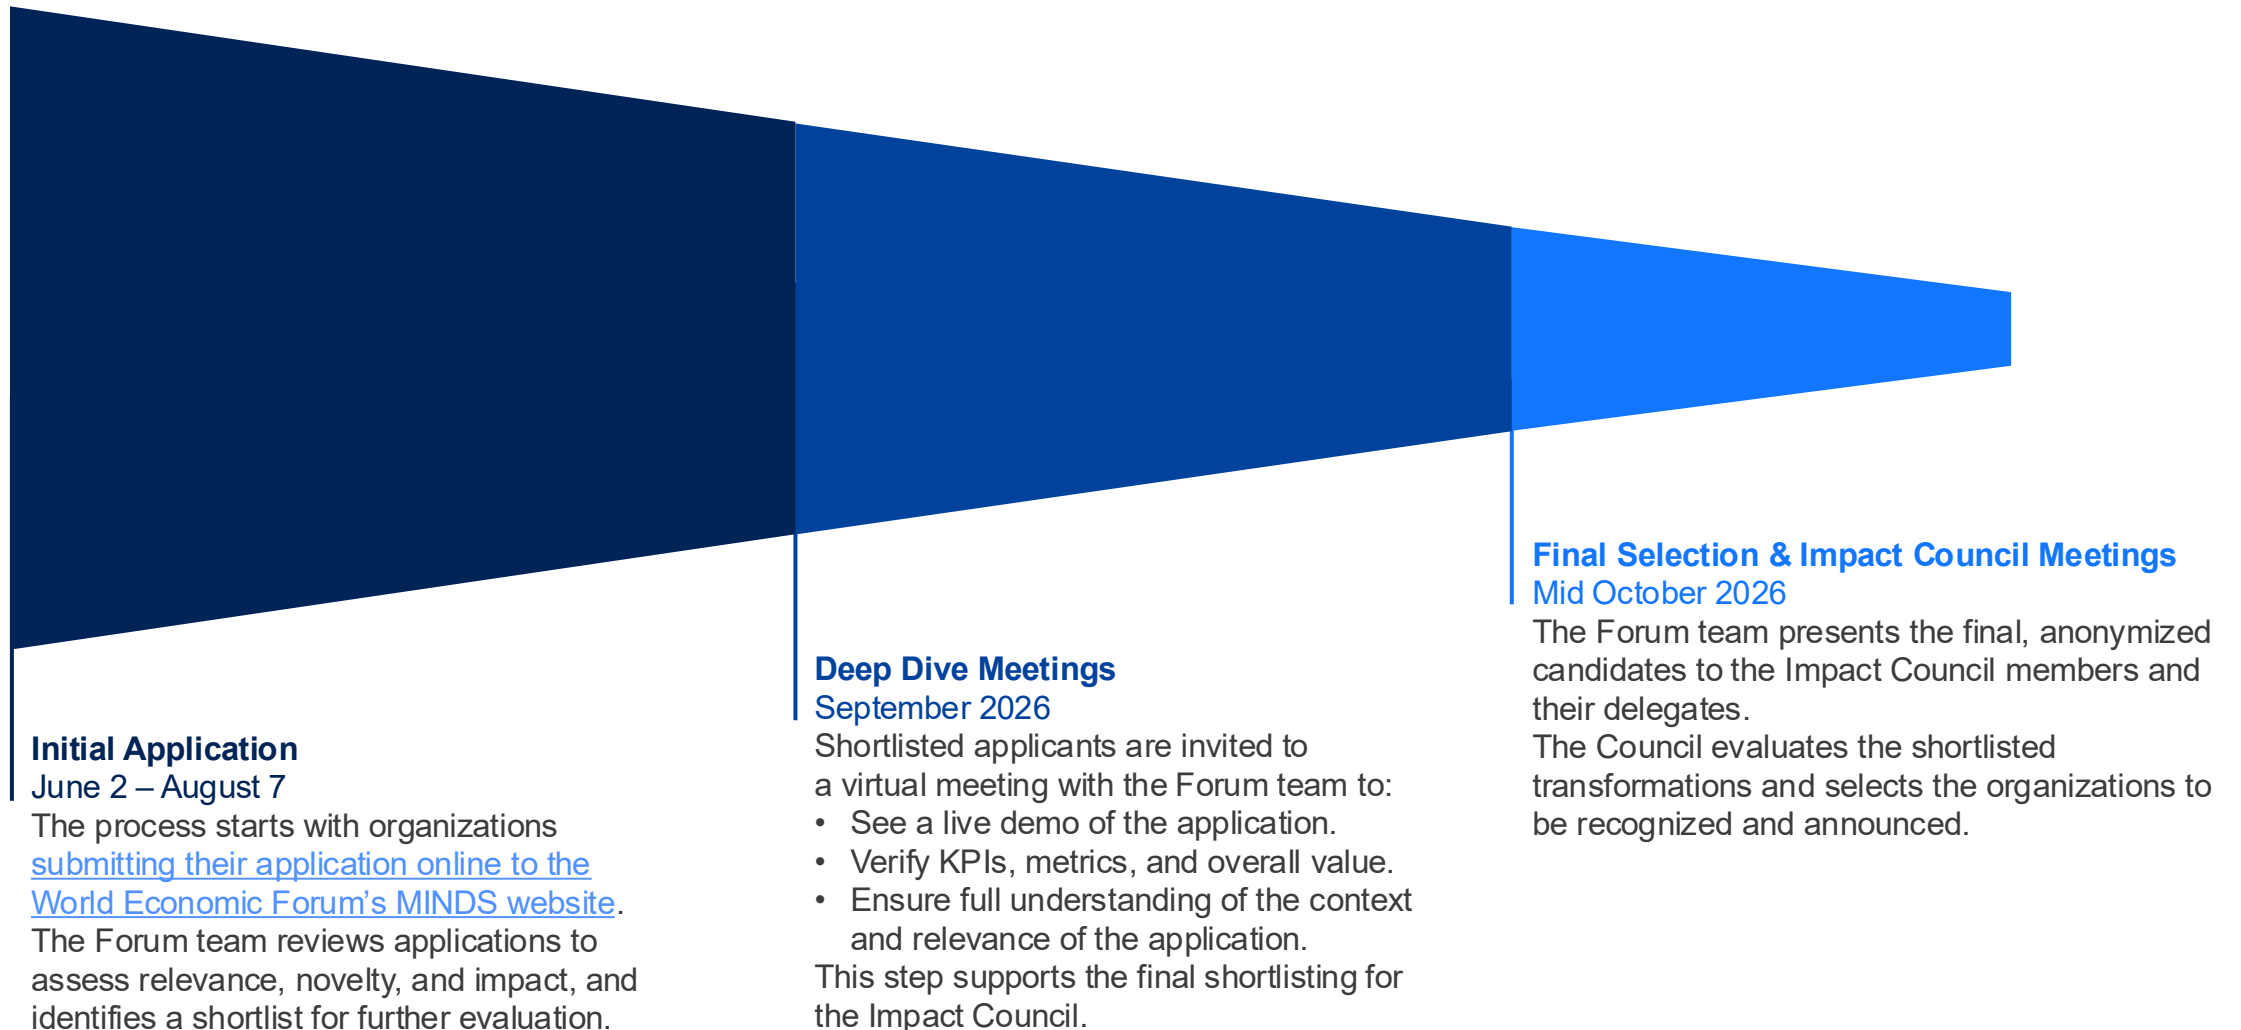

Evaluates whether the solution is developed and deployed safely, ethically, and in line with regulations and responsible AI practices.

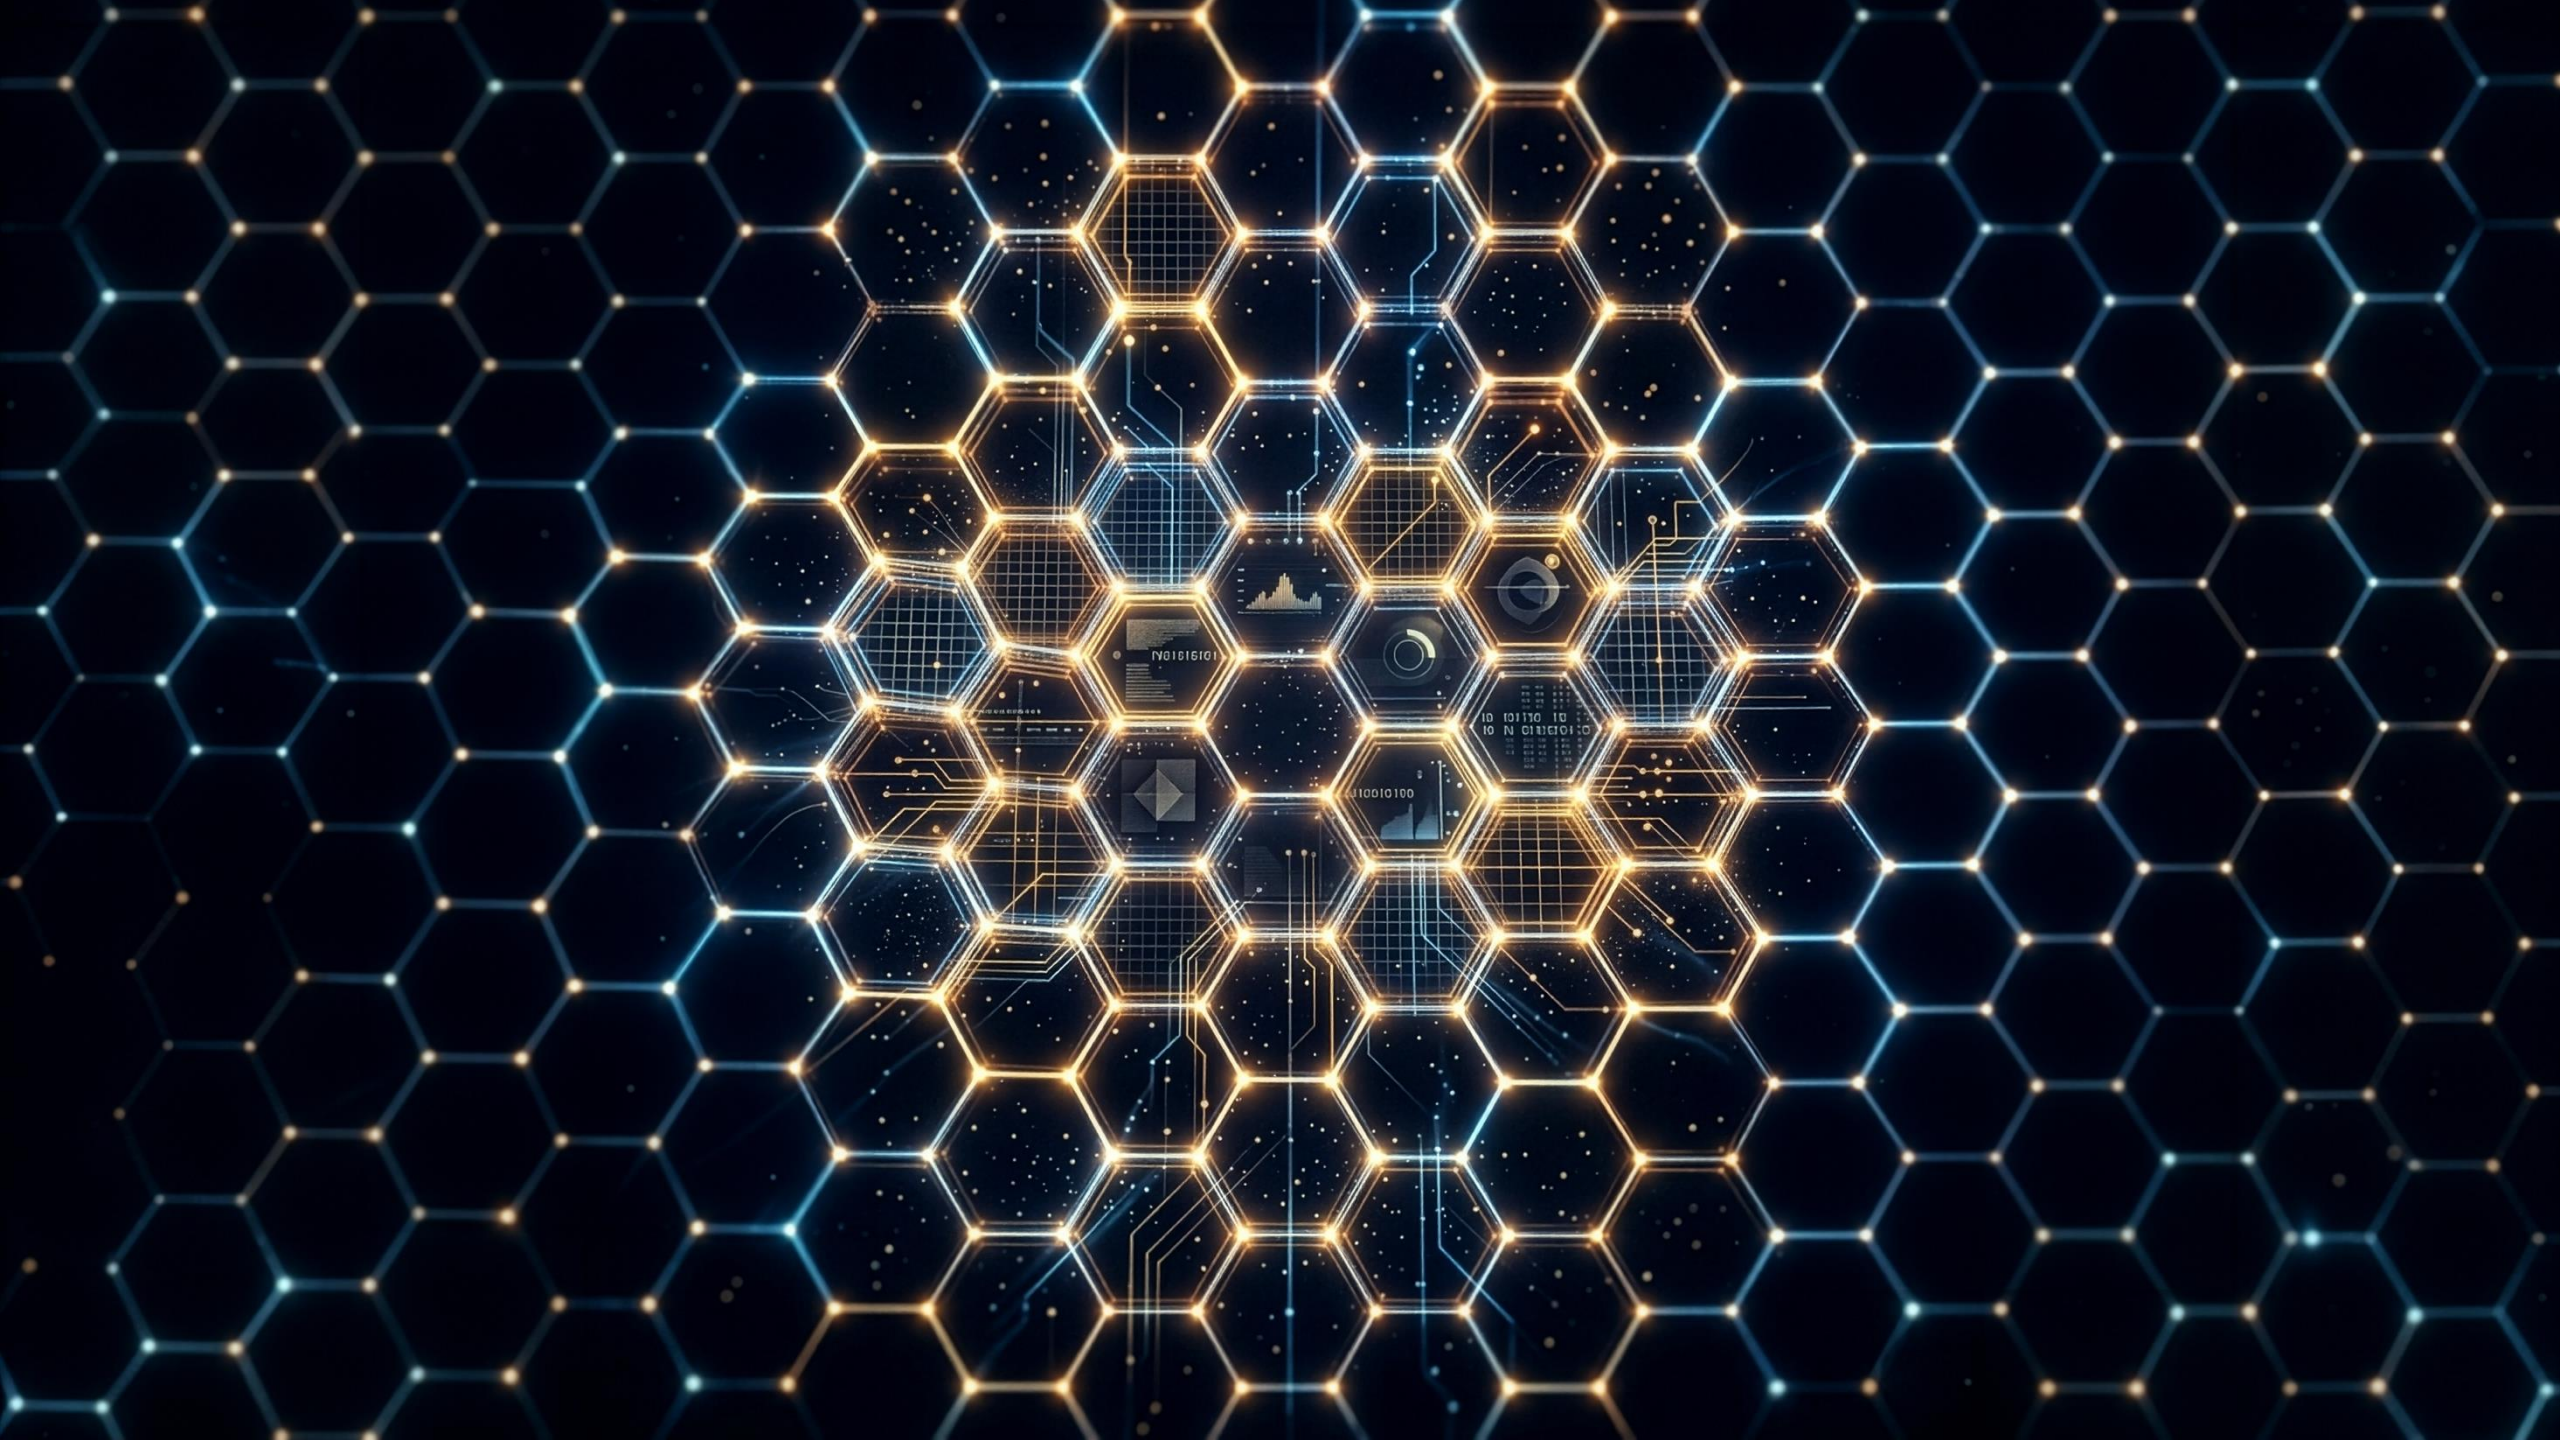

Companies must demonstrate compliance with local regulations and a commitment to responsible AI practices

The **more details** are shared in the **application survey**, the better the application can be understood and evaluated.

Selection Process

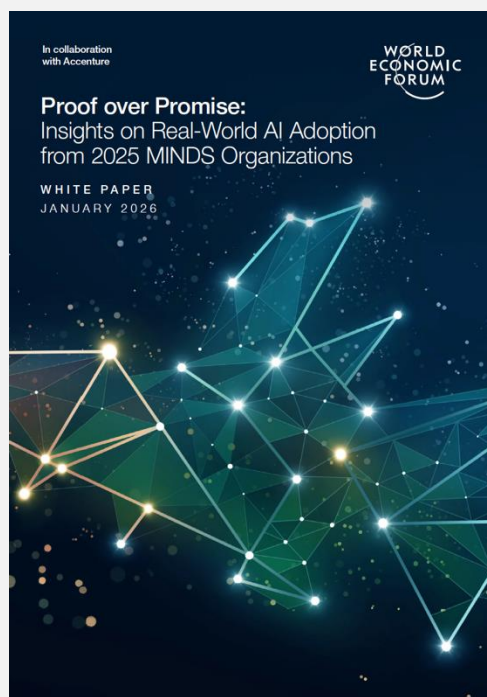

Spotlight – How and Where

Selected cases will be spotlighted through multiple channels and different opportunities to amplify broader knowledge of impactful AI applications.

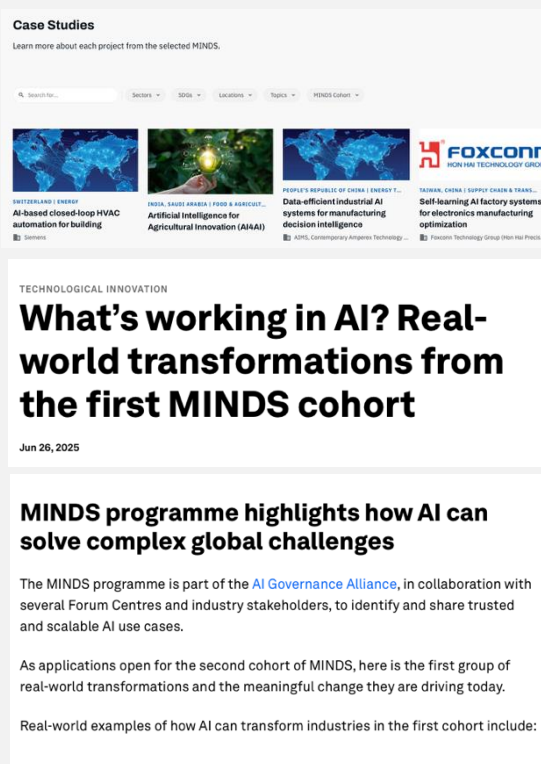

Subject to specific approvals

Report Feature

White paper published during AM26:
Proof over Promise: Insights on Real-World AI Adoption from 2025 MINDS Organizations

Website Feature

Agenda Blog and Press Releases

Opportunities during Forum events (Forum partners)

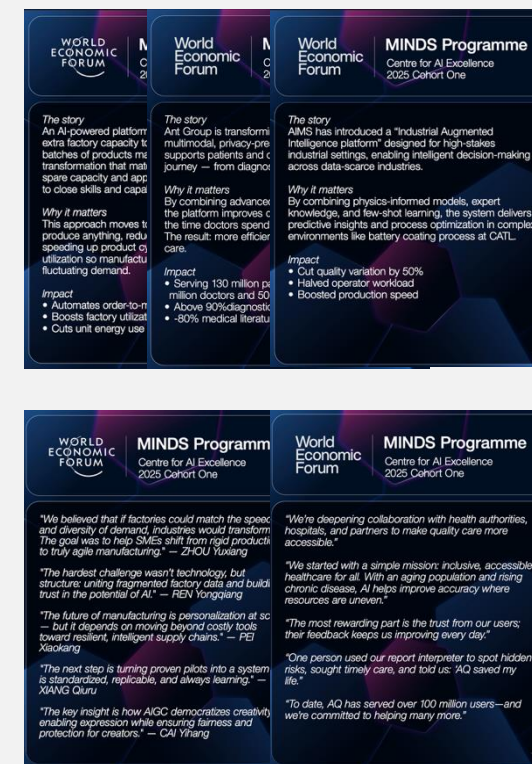

MINDS awarding ceremony

Workshop: AI Champions Transforming Industries

Social Media Campaign

Selected use cases from MINDS Cohort 1 for multi channel social media campaign

Connect – MINDS Exchange Series

A recurring MINDS series showcasing real-world AI innovations, offering a platform for leaders to share learnings, solutions, and emerging approaches from the MINDS cohorts. Small-group, practitioner-level discussions spotlight real cases.

Contents

- | | | | |
|---|-------|--------|---|
| 1 | 14:00 | 5 min | Welcome, Session Objectives and Updates |
| 2 | 14:05 | 15 min | Speaker Guest presentations: Insights and Q&A from Foxconn Technology Group |
| 3 | 14:20 | 20 min | Live Q&A |
| 4 | 14:40 | 5 min | Closing, recap, and next steps |

Speakers for today

Redefining the Future of Electronics Manufacturing

Shi Zhe, Foxconn Technology Group,
Chief Digital Officer

Maria Basso, World Economic Forum
Head, AI Application and Impact

OVERVIEW

Objectives for today

- | | |
|---|--|
| 1 | Explore real-world example of how companies can turn human expertise into AI-usable knowledge and apply AI agents to streamline operational decisions. |
| 2 | Build practical enablers and learnings directly applicable to each organisations' AI transformations across all industries. |
| 3 | Discover what's next for AI-driven operations and how leaders can prepare. |

Thank you!
